

Heavyweight Kevlar Protective Fleece

DESCRIPTION

This heavyweight knitted Kevlar® fleece fabric is ideal for sewing into any garment to add a more significant level of abrasion, rip and slash protection.

The fabric is soft and flexible and offers excellent stretch making it suitable for general use whilst its fleece finish on one side creates a thick barrier of Kevlar® to provide enhanced protection from heat, abrasion and sharp objects. If your priority is to add a greater level of Kevlar protection to a garment such as jeans, jackets or tops, particularly in high risk areas then this would be the material to go for.

This heavyweight fleeced Kevlar® fabric is also used in seating and for a range of applications in the transport sector.

An alternative lighter Kevlar® Loopback Protective Fabric is also available for less demanding applications or where less bulk and less warmth is a requirement (such as T-shirts and underwear).

PROPERTIES

Product Code	KKF-FL400
Description	Technical protection fabric
Construction	Knitted Single Sided Fleece
Composition	100% DuPont Kevlar or similar
Colour	Natural (Yellow)
Weight	400 grams per metre +/- 5% 600 grams per linear metre approx
Width	1.5m typ. Relaxed
Packaging	On rolls, polythene wrapped, bulk packed on pallets
Roll length	50m Typ.
Roll weight	30kg Typ.
