

Kevlar Protective Loopbacked Fabric

DESCRIPTION

This lightweight knitted Kevlar® clothing fabric is ideal for sewing into any garment to add a reasonable level of protection from abrasion, rips and slashes.

The fabric is soft and flexible and offers excellent stretch making it suitable for general use. The 'loopback' knitting (similar to towelling material) on one side gives the fabric additional thickness whilst keeping the weight down.

If you want to add the protection of Kevlar® to any garment such as a jeans, jackets, T-shirts or even underwear without adding too much weight or making the garment too warm then this is the right choice. This is our recommended Kevlar lining for clothing, ideal for lining T-shirts, tops and jeans to improve their protective properties for motorcycle/motorsport use or add slash protection and slash resistance for clothing or burn protection to the same garments. A greater level of protection can be found in our **Heavyweight Kevlar® Protective Fleece Fabric** which would be recommended to add maximum protection to high risk areas.

PROPERTIES

Quality Reference	KKF-LP375
Description	Technical protection fabric
Construction	Knitted Single Sided Fleece
Composition	100% DuPont Kevlar or similar
Colour	Natural (Yellow)
Weight	375grams per metre +/- 5% 562 grams per linear metre approx
Width	1.6m typ. Relaxed
Packaging	On rolls, polythene wrapped, bulk packed on pallets
Roll length	50m Typ.
Roll weight	20kg Typ.
